Tutorial No : 10

Tutorial Title: Write a C++ program which uses Try and Catch for exception handling.
Name of Student: Vikiraj Vadghane
Class: SY **Div:** 2 **PRN No:**B25ET1200 **Batch:**C

Program:

```
#include <iostream>
using namespace std;

int main() {
   int a, b, c;

   cout << "Enter a value for a: ";
   cin >> a;

   cout << "Enter a value for b: ";
   cin >> b;

   try {
      if( b == 0){
         throw b;
      }

      c = a / b;
      cout << "The div \t << c";
   }

   catch(int x){
      cout << "\nDiv by zero not permited";
      cout << "The error is div by: \t" << x;
   }

   cout << endl << "At the end of main() function";

   return 0;
}
```

Output :

Output
Enter a value for a: 10
Enter a value for b: 4
The div << c
At the end of main() function
=== Code Execution Successful ===
